MICROFLEX 1550 EE with proof print

Quotation: Used mounting machine, serial number 4243
According to your request please find below price for used mounting machine type EE.
The machine was initially produced in 1999. Print width is 1550 mm and min. /max. repeat is
280mm/1016mm. The mounting machine has proof print.

The below price does not include refurbishment. The machine has scratches and some of the
parts are rusty but the machine functions very well. We can refurbish the machine before
shipment according to requirements from the customer. A quotation for refurbishment can be
sent on request.

Description
Mounting machine, used from 1999 as described
Semi automatic sleeve mounting
Air management for semi automatic sleeve mounting
Panel upgrade (see enclosure for details), exchange of operator panel and new software
version.

Mounting cylinder (optional, drawing required)

The mounting cylinder is not included in the price. We have no cylinder drawing, so please
be aware that the machine is not adapted to specific customer needs.

The price is uncrated, ex works. Installation at the customer can be quoted on request.
12 months warranty on parts.

Improvements and differences compared to the original solution

- ✓ Improved booting time and the possibility for the operator to follow the boot time
- ✓ Faster control on the panel
- ✓ Status is shown on a graph at start-up
- ✓ The first cursor in the panel display is always active when entering a new picture. For entering any values, just go to the actual input field by using the arrow buttons (no need to press the "?").
- ✓ Improved screen features such as new colours, lines and input fields
- ✓ Easy change of language, to be selected in "Technical Machine Setup"; it is active instantly.
- ✓ Under "Work Cylinder Repair" the" Next Position" is shown on the display. The operator can now choose the next position, or see which position the machine is going for, when activating the NEXT button.
- ✓ The machine is only working in 1/100 millimeters (1/1 millimeter is not possible). The INCH mode is identical.
- ✓ Improved disc handling system.
- ✓ When using the read or write function, status is shown on a graph. Jobs can easily be deleted on the USB/hard disc, just enter the job name and choose DELETE (confirmation is required).
- ✓ Improved "read" and "write" speed.
- ✓ The files are stored as CSV files and can be viewed in windows excel.
